DEMO

WHAT IS IT?

Diagnosis AI is a website that gives you information on wounds, scabs, bruises, and/or other medical activities.

Our chatbot gives you curated results on how to treat your symptoms.

HOW ITS MADE

Claude 3.5

Claude 3.5 is the
smartest AI in 2024.
having frontier
intelligence at over 2x
speeds.

Datasets

Claude 3.5 is trained on approved health
datasets such as MedMist & Symcat4.
Leveraging data to give you the best
diagnostic possible

Vision

DaignosisAI's vision
feature is trained on
Google's vision AI.
Curated to healthcare,
we provide the best
vision analysis in the
market

THE PROCESS

PROCESS (WEB)

We used frameworks such
as Bootstrap to design the
website.

PROCESS (AI)

Soon we moved on to the chatbot. We went through many bots and finally settled on ClaudeAI as it was free and extremely skilled in our field.

BY ANTHROPIC

PROCESS (VISION)

Vision was the hardest part.

We first started with

Microsoft Azure. Then we tried working with ChatGPT.

We realized how expensive everything was. That's when we settled on Google Vision.

Google Cloud
Vision API

IMPACT

The impact our products would have on the Medical Field can be substantial. From diagnosing an infection to informing how to stop the infection from becoming deadly.
